

Kellar-Studio Command Center

Desktop Application Blueprint & Unified Full-Stack Conversion Specification

System Architecture	Infrastructure-as-Code Orchestration	Target Environment	Electron / React Desktop App
Total Modules Indexed	50 Core Daemon Scripts	Security Protocol	Dotenv-Vault AES-256 Runtime

1. DESKTOP APPLICATION UI LAYOUT MAP

The high-fidelity visual translation map transforming decentralized scripts into a comprehensive multi-pane unified application dashboard control framework.

2. ARCHITECTURAL MODULE CONVERSION MATRIX

Direct blueprint mapping all 50 infrastructure automation scripts from the ecosystem repository directly into individual user-interface control components.

Zone 1: Media Ingestion & Transformation Framework (Scripts 01-20)

UI FEATURE COMPONENT	HANDLED BACKEND SCRIPTS	UI CONTROLS & ELEMENTS
Ingestion Gatekeeper	<code>01_nomenclature_validator.js</code> <code>07_stage_router.js</code>	Drag-and-drop file asset uploader zone with immediate UI toast notification validation flags.
Audio Processing Rack	<code>02_audio_auditor.js</code> <code>14_lufs_normalizer.js</code>	Live signal level meters displaying Peak/RMS levels alongside automatic target matching toggles (-14 LUFS).
Video Transcoding Engine	<code>03_framerate_conformer.js</code> <code>04_proxy_generator.js</code> <code>11_thumbnail_extractor.js</code>	Direct integration matrix with FFmpeg layer. Displays precise progress indicators for 1080p CFR proxies.
FX & Composition Matrix	<code>05_pip_geometry_engine.js</code> <code>06_watermark_stamper.js</code> <code>27_geometry_compliance_validator.js</code>	Visual aspect panel configuration grid detailing safety margins, layouts, and overlay opacity tracking sliders.
Notification Hub	<code>08_webhook_notifier.js</code> <code>09_social_distribution_api.js</code> <code>16_client_delivery_mailer.js</code> <code>17_discord_community_bot.js</code>	Matrix routing switch nodes configuring target distribution deployment avenues (Discord, Email, Webhooks).
Cloud & Automation Pipeline	<code>10_storage_janitor.js</code> <code>12_notion_calendar_sync.js</code> <code>13_whisper_transcriber.js</code> <code>15_nas_backup_uploader.js</code> <code>18_metadata_json_compiler.js</code> <code>19_master_integrator.js</code>	NAS file upload sync wheel indicators, automated Whisper text transcription viewport panels, and database metadata logs.

Zone 2: Analytics & Integration Framework (Scripts 21-40)

UI FEATURE COMPONENT	HANDLED BACKEND SCRIPTS	UI CONTROLS & ELEMENTS
System Vitals Monitor	<code>21_system_integrity_monitor.js</code> <code>23_performance_logger.js</code> <code>29_dependency_health_checker.js</code>	Real-time CPU/RAM hardware graphs, I/O latency trackers, and automated ecosystem integrity confirmation trees.
AI Aesthetic Engine	<code>22_ai_aesthetic_analyzer.js</code>	Visual quality confidence dials (0-100%) tracking pixel metrics and flagging compression artifact drops.
Task Queue & Intelligence	<code>25_priority_queue_manager.js</code> <code>26_vault_encryption_service.js</code> <code>31_pipeline_load_balancer.js</code> <code>33_content_similarity_search.js</code> <code>34_cross_platform_metadata.js</code>	Draggable data workflow prioritization lanes, asset duplication security alerts, and master fingerprint hashes.
Quality Control & Enforcers	<code>35_brand_color_enforcer.js</code> <code>39_automated_qc_tester.js</code>	Digital vectorscope grids checking broadcast signal parameters and automated brand color profile compliance.
Self-Healing Infrastructure	<code>24_remote_sync_manager.js</code> <code>28_notion_archive_cleanup.js</code> <code>30_auto_deploy_master.js</code> <code>32_predictive_storage_forecast.js</code> <code>36_self_healing_cache.js</code> <code>38_smart_folder_archiver.js</code> <code>40_master_reboot_sequence.js</code>	Manual cache flush controls, visual memory footprint trackers, predictive storage saturation line charts, and hard system restart panels.

Zone 3: System Governance & Core Control (Scripts 41-50)

UI Feature Component	Handled Backend Scripts	UI Controls & Elements
The Brain (Orchestrator)	41_pipeline_controller.js 42_pipeline_config.json 43_dynamic_registry.js	Interactive topological node canvas rendering running links across the Controller → Registry → Worker topology.
The Safety Net	44_exception_handler.js 45_environment_validator.js 50_emergency_shutdown_sequence.js	Prominent high-priority Crimson Global Emergency Shutdown trigger button complete with glass flip-cover confirmation check layout.
Daemons & Log Aggregators	46_log_rotator.js 47_process_daemon.config.js 49_pipeline_dashboard_status.js	Live streaming terminal output viewer directly referencing PM2 configuration profiles and historical automated log rotation indexes.
Security & Encryption Sync	48_vault_security_sync.js	Dotenv-Vault verification state badge monitoring system memory access configuration without plaintext environment exposures.

3. 4K RENDER VIEWPORT & SPATIAL TOKEN PARAMETERS

The structural configuration matrix used to render and realize the application interface within high-end 3D environments or vector-accurate presentation layer engines.

Projection Profile	Isometric 3D Workspace Model Projection
Camera Alignment Matrix	35° Isometric Tilt Angle // -45° Precision Viewport Rotation Angle
Z-Axis Depth Stratification	Canvas Baseline (Z:0px) Panels (Z:+10px) Active Nodes (Z:+25px) Alerts (Z:+50px)
Environment Lighting Array	Neon Emerald Key Light Vector (Top-Left) paired with Dark-Crimson Edge Backlights
Chassis Base Material	Anodized Brushed Cyber-Grip Heavy Metal Aluminum Frame (#0D0F12, 0.4 Roughness)
Glassmorphic Container Layer	Translucent Frosted Acrylic Plate Layer (#1A1D24, 72% Material Opacity, 15px Subsurface Blur)
Typography Interface Font	Clean Core Text Systems (Inter UI Sans) // Monospace Logging Infrastructure (Fira Code Mono)
